## **Wildlife and Highway Management**

Lesson 3: How Can We Determine if We Have Been Successful?

#### LESSON OVERVIEW

Students read about an experiment designed to collect data on which animals use wildlife underpasses and how they use them. The students use this information to design a research question that they could answer with the collected data and propose a hypothesis. Then, they have the opportunity to analyze the data to develop a conclusion about their research question.

#### SUGGESTED GRADE LEVELS

7 − 12

#### ENDURING UNDERSTANDINGS

- Accurate and reliable data must be analyzed impartially to develop conclusions.
- Technology has improved data collection for scientists.

#### **OBJECTIVE**

Students will:

- Read and understand an experimental design.
- Formulate a research question and propose a hypothesis.
- Use data to develop a conclusion.

*Note: The full text of these standards can be found in Appendix A.* 

#### TIME FRAME

• Two days (45 minutes each day)

#### **MATERIALS**

- Do Underpasses Really Work? worksheet (one class set)
- Experiment Planning and Comprehension worksheet (one per student)
- *Analyzing the Data* worksheet (one per student)
- Research Rubric (one per student)
- Optional: Computers with Internet access

#### TEACHER PREPARATION

- Make a class set of copies of the *Do Underpasses Really Work?* worksheet.
- Make copies of the Experiment Planning and Comprehension, Analyzing the Data worksheets and the Research Rubric for each student.

#### SUGGESTED PROCEDURES

- 1. Hand out the *Do Underpasses Really Work?* worksheet.
- 2. Inform the students that the Arizona Game and Fish Department and the Arizona Department of Transportation have begun building underpasses to prevent wildlife-elk collisions. It is now the responsibility of the students to determine if these underpasses are successful.
- 3. Give the students time to read the worksheet.
- 4. Initiate a brief discussion of the worksheet. Point out that a lot of information was presented about what researchers are doing to study the underpasses. Now it is up to the students to come up with a research question that can be answered using the data collected by the researchers and propose a hypothesis.
- 5. Hand out the *Experiment Planning and Comprehension* worksheet.
- 6. Provide time for the students to answer the questions. If they do not finish, allow them to complete the worksheet for homework.
- 7. When the students have completed the worksheet, inform them that they will now have the opportunity to look at the data collected so far. Make it clear that they don't need to use all of the data on the worksheet. They should use only the information that is related to their question and hypothesis. When they are ready, they will prepare a formal scientific report in which they share the results of their experiment.
- 8. Hand out the *Analyzing the Data* worksheet and the *Research Rubric*.
- 9. Allow time for the students to prepare their reports using the rubric for guidance as they write.

#### ASSESSMENT

• Scientific report

#### **EXTENSIONS**

- Have the students compare their results with the official results posted at the Arizona Game and Fish Web site and explain why there may or may not be differences.
- Students can develop visual displays of their experiment and the class can hold a poster session or similar scientific conference to present their results.

#### **Science Standards**

Grade	Strand	Concept	Performance Objective
7	1	1 – Observations,	1 – Formulate questions based on
		Questions, and	observations that lead to the
		Hypotheses	development of a hypothesis
		2 – Scientific	2 – Design an investigation to test
		Testing	individual variables using scientific
			processes
		3 – Analysis and	1 – Analyze data obtained in a scientific
		Conclusions	investigation to identify trends
			2 – Form a logical argument about a
			correlation between variables or
			sequence of events
			3 – Analyze results of data collection in
			order to accept or reject the hypothesis
			4 – Determine the validity and reliability
			of results of an investigation
			5 – Formulate a conclusion based on
			data analysis
			6 – Refine hypotheses based on results
			from investigations 7 – Formulate new questions based on
			the results of a previous investigation
		4 – Communication	1 – Choose and appropriate graphic
		+ Communication	representation for collected data
			2 – Display data collected from a
			controlled investigation
			3 – Communicate the results of an
			investigation with appropriate use of
			qualitative and quantitative information
			5 – Communicate the results and
			conclusion of the investigation
	2	1 – History of	4 – Analyze the use of technology in
		Science as a Human	science-related careers
		Endeavor	
	3	1 – Changes in	1 – Analyze environmental risks caused
		Environments	by human interaction with biological or
			geological systems
8	1	1 – Observations,	1 – Formulate questions based on
		Questions, and	observations that lead to the
		Hypotheses	development of a hypothesis
			3 – Generate a hypothesis that can be
			tested
		2 – Scientific	2 – Design a controlled investigation to
		Testing	support or reject a hypothesis

**Science Standards Continued** 

Science Standards Continued			
Grade	Strand	Concept	Performance Objective
8	1	3 – Analysis and	1 – Analyze data obtained in a scientific
		Conclusions	investigation to identify trends
			2 – Form a logical argument about a
			correlation between variables or
			sequence of events
			4 – Formulate a future investigation
			based on the data collected
			5 – Explain how evidence supports the
			validity and reliability of a conclusion
			8 – Formulate new questions based on
			the results of a previous investigation
		4 – Communication	1 – Communicate the results of an
			investigation
			2 – Choose an appropriate graphic
			representation for collected data
			3 – Present analyses and conclusions in
			clear, concise formats
			5 – Communicate the results and
TT' 1	1	1 01 4	conclusion of the investigation
High	1	1 – Observations,	1 – Evaluate scientific information for
School		Questions, and	relevance to a given problem
		Hypotheses	2 – Develop questions from
			observations that transition into testable hypotheses
			3 – Formulate a testable hypothesis
		3 – Analysis,	1 – Interpret data that show a variety of
		Conclusion, and	possible relationships between variables
		Refinement	2 – Evaluate whether investigational
		Kerment	data support or do not support the
			proposed hypothesis
			7 – Propose further investigations based
			on the findings of a conducted
			investigation
		4 – Communication	1 – For a specific investigation, choose
			an appropriate method for
			communicating the results
			2 – Produce graphs that communicate
			data
			3 – Communicate results clearly and
			logically
			4 – Support conclusions with logical
			scientific arguments
	j	<u> </u>	serentine arguments

#### **Science Standards Continued**

Grade	Strand	Concept	Performance Objective
High	3	1 – Changes in	1 – Evaluate how the processes of
School		Environments	natural ecosystems affect, and are
			affected by, humans
			3 – Assess how human activities can
			affect the potential for hazards
			5 – Evaluate the effectiveness of
			conservation practices and preservation
			techniques on environmental quality and
			biodiversity
		2 – Science and	5 – Evaluate methods used to manage
		Technology in	natural resources
		Society	

#### **Mathematics Standards**

Mathematics Standards			
Grade	Strand	Concept	Performance Objective
7	2	1 – Data Analysis (Statistics)	3 – Determine when it is appropriate to use histograms, line graphs, double bar graphs, and stem-and-leaf plots 4 – Interpret data displays including histograms, stem-and-leaf plots, circle graphs, and double line graphs 7 – Interpret trends from displayed data 8 – Compare trends in data related to the same investigation 9 – Solve contextual problems using histograms, line graphs or continuous data, double bar graphs, and stem-and-leaf plots
8	2	1 – Data Analysis (Statistics)	3 – Determine the appropriate type of graphical display for a given data set 7 – Formulate reasonable predictions based on a given set of data 8 – Compare trends in data related to the same investigation
High School	2	1 – Data Analysis (Statistics)	2 – Organize collected data into an appropriate graphical representation 8 – Make reasonable predictions for a set of data, based on patterns 9 – Draw inferences from charts, tables, graphs, plots, or data sets 11 – Evaluate the reasonableness of conclusions drawn from data analysis

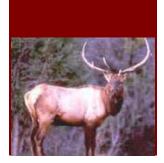

**Writing Standards** 

	<u>Standards</u>		T
Grade	Strand	Concept	Performance Objective
7 - 8	2	1 – Ideas and	1 – Use clear, focused ideas and details to
		Content	support the topic
			3 – Develop a sufficient explanation or
			exploration of the topic
			4 – Include ideas and details that show
			original perspective
		2 –	3 – Place details appropriately to support
		Organization	the main idea
			5 – Construct paragraphs by arranging
			sentences with an organizing principle (e.g.,
			to develop a topic, to indicate a chronology)
		3 – Voice	2 – Convey a sense of identity through
			originality, sincerity, liveliness, or humor
			appropriate to the topic and type of writing
			4 – Choose appropriate voice (e.g., formal,
			informal, academic discourse) for the
			audience and purpose
		4 – Word	1 – Use accurate, specific, powerful words
		Choice	that effectively convey the intended
			message
			3 – Use vocabulary that is original, varied,
			and natural
		5 – Sentence	2 – Create sentences that flow together and
		Fluency	sound natural when read aloud
	3	2 – Expository	1 – Record information (e.g., observations,
			notes, lists, charts, map labels and legends)
			related to the topic
			3 – Write a process essay that includes:
			a. a thesis statement
			b. supporting details
			c. introductory, body, and concluding
			paragraphs
High	2	1 – Ideas and	3 – Provide sufficient, relevant and
School		Content	carefully selected details for support
			5 – Include ideas and details that show
			original perspective and insights
		2 –	3 – Place details appropriately to support
		Organization	the main idea
		<i>G</i>	5 – Employ a variety of paragraphing
			strategies (e.g., topical, chronological,
			spatial) appropriate to application and
			purpose
	1	<u> </u>	Parkon

**Writing Standards Continued** 

Writing	Writing Standards Continued			
Grade	Strand	Concept	Performance Objective	
High	2	3 – Voice	2 – Convey a sense of identity through	
School			originality, sincerity, liveliness, or humor	
			appropriate to the topic and type of writing	
			3 – Choose appropriate voice (e.g., formal,	
			informal, academic discourse) for the	
			application	
		4 – Word	1 – Use accurate, specific, powerful words	
		Choice	and phrases that effectively convey the	
			intended message	
			2 – Use vocabulary that is original, varied,	
			and natural	
			3 – Use words that evoke clear images	
		5 – Sentence	3 – Demonstrate a flow that is natural and	
		Fluency	powerful when read aloud	
	3	2 – Expository	1 – Write a multi-paragraph essay that:	
			a. includes background information to	
			set up the thesis (hypothesis,	
			essential question), as appropriate	
			b. states a thesis with a narrow focus	
			c. includes evidence in support of a	
			thesis in the form of details, facts,	
			examples, or reasons	
			d. communicates information and ideas	
			from primary and/or secondary	
			sources accurately and coherently,	
			as appropriate	
			e. attributes sources of information as	
			appropriate	
			f. includes a topic sentence for each	
			body paragraph	
			g. includes relevant factors and	
			variables that need to be considered	
			h. Includes visual aids to organize and	
			record information on charts, tables,	
			maps, and graphs, as appropriate	
			i. includes an effective conclusion	

#### Appendix B: Worksheets and Overheads

The pages that follow contain the worksheets listed below:

- A. *Do Underpasses Really Work?* A summary of the experimental design for the highway underpasses along State Route 260 (3 pages)
- B. *Experiment Planning and Comprehension* A handout which helps the students determine questions that they can study (1 page)
- C. *Analyzing the Data* A summary of the actual data collected on wildlife usage of highway underpasses along State Route 260 (2 pages)
- D. Research Rubric One method to evaluate the student report (1 page)
